116-06B-SOR
SOR TRANSFER BOOT REPAIR KIT
Fits 9/72-9/73 FJ40

1. Remove knob from lever.
2. Unbolt and remove old transfer boot.
3. Carefully cut old material from inside edge of metal retainer ring.
4. Place new boot material thru metal retaining ring, with seam in new material facing toward the rear of the vehicle. Fold bottom edges of material outwards and upwards from the bottom of the retainer ring. Let excess material protrude upwards.
5. Slide new boot over lever, back into place, rebolt to factory transmission hump. CAREFULLY trim excess new material from the outer edge of metal retainer ring.
6. Reinstall transfer lever knob.
